LABOR CATEGORY DESCRIPTIONS

Code	Labor Category	Description	Education/Experience
AD6	Application Developer 6	Works with client engineers and scientists in developing advanced scientific software. Provides engineering/software engineering services, regarding scientific and engineering topics, such as computational fluid dynamics, verification and validation, statistical analysis, and quality engineering. Writes technical and user documentation.	Master's degree in a related field and seven (7) years of experience in a related field or thirteen (13) years of experience in a related field.
AD7	Application Developer 7	Works with client engineers and scientists in developing advanced scientific software. Supports client engineers and scientists in conducting scientific research. Provides engineering/software engineering services, regarding scientific and engineering topics, such as computational fluid dynamics, verification and validation, statistical analysis, and quality engineering. Writes technical and user documentation.	Doctoral degree in a related field and seven (7) years of experience in a related field or fifteen (15) years of experience in a related field.
BA4	Business Analyst 4	Supports senior technical and engineering personnel, assisting in systems analysis and system design of complex, integrated systems. Performs assigned portions of system design, research and evaluations, trade studies, technical and fiscal optimizations, reliability and maintainability evaluations, simulation analysis, and performance predictions. Assists in developing complex technical documentation and technical presentations. Participates in all phases of system development, including planning, analysis, development, integration, testing, and acceptance.	Bachelor's degree in a related field and six (6) years of experience in a related field or ten (10) years of experience in a related field.
CO4	Consultant 4	Initiates and oversees the performance of project tasks. Provides guidance and expertise to project staff, making sure that methods, tools, and techniques are the most current. Provides technical expertise in a subject area. Oversees the analysis and identification of business processes in requirements determination. Ensures compliance with all applicable standards. Manages schedules and budgets.	Master's degree in a related field and eight (8) years of experience in a related field or fourteen (14) years of experience in a related field.
DM3	Database Management Specialist 3	Manages the development of database projects. Plans and budgets staff and database resources. Prepares and delivers presentations on database concepts. Provides daily supervision and direction to support staff. Can perform all tasks of Database Management Specialist 1 and 2 roles above. Uses best available performance and monitoring tools to maintain databases.	Bachelor's degree in a related field and six (6) years of experience in a related field or ten (10) years of experience in a related field.

McFarland Technology, Inc.
GS-35F-090DA

IS3	Internet Specialist 3	Provides a wide set of disciplines for planning, analysis, design, and construction of web-based applications. Consults with users to determine systems and content requirements. Designs architecture, including software, hardware, and communications to support requirements and interfaces. Ensures systems are compatible and in compliance with standards.	Bachelor's degree in a related area and six (6) years of experience in a related field or ten (10) years of experience in a related field.
IT5	IT Professional 5	Manages systems engineering, analysis, design, documentation, and implementation of very complex applications. Manages all phases of software and/or network engineering with emphasis on planning, engineering, analysis, testing, and acceptance phases. Designs and prepares technical reports and related documentation. Prepares and delivers presentations and briefs, as required.	Master's degree in a related field and nine (9) years of experience in a related field or fifteen (15) years of experience in a related field.
PG4	Program Manager 4	Has the experience and skills necessary to perform the following tasks: manage substantial complex design, development, integration, testing, and documentation operations for multiple tasks. Organizes, directs, and coordinates planning and implementation of contract support activities. Interacts with customer personnel. Formulates and reviews project feasibility studies, determines costs, and ensures conformance to work standards. Interprets policies, purposes, and goals of the customer organizations for subordinates. Manages support for complex systems. Identifies, acquires, and uses company resources to achieve project technical objectives. Applies a wide range of tools, such as EVM, Lean Six Sigma, and PMBOK.	Bachelor's degree in a related field and twelve (12) years of experience in a related field or sixteen (16) years of experience in a related field.
PJ2	Project Manager 2	Provides project supervision and management for major program activities. Manages and directs technical project/program personnel to ensure objectives are met. Manages large projects involving multifunctional tasking and substantial complexity. Plans and supervises system life cycle support tasks/functions, including requirements definition, acquisition, integration, test and evaluation, fielding/installation, and disposition. Applies a wide range of tools, such as EVM, Lean Six Sigma, and PMBOK.	Bachelor's degree in a related field and ten (10) years of experience in a related field or fourteen (14) years of experience in a related field.
